## What We Are Learning

<u>Reading</u>	<u>Writing</u>	<u>Math</u>	<u>Science</u>	<u>Social Studies</u>
Students will make inferences, determine the theme of a story, and read about mythological gods and goddesses.	Students will read about the great state of North Carolina to write informative paragraphs.	Students will be using place value and multiplication properties to solve multi-step word problems, and multiply a whole number of up to four digits by a one-digit whole number.	Students will explain how electrically charged objects push or pull on other electrically charged objects and produce motion and compare the physical properties of samples of matter.	Students will understand the development, structure, and function of North Carolina's government and analyze the North Carolina Constitution.

Parents,

We are asking your help with a brief survey. The first questions are about your demographics. The remaining questions are about the culture and climate of our school. Please go to the web address below to take the survey. Thank you!

Mrs. Goodwin
